

THINGS YOU'LL NEED TO KNOW & DO

Your roadmap for a smooth Rev.io onboarding

Thank you for your business. As we begin onboarding, please understand that Rev.io may not operate exactly like your previous systems — to maximize the platform's value, be open to learning new processes. Your first step is a detailed kick-off call where your project manager will provide an onboarding packet. The list below will help you prepare for a smooth transition.

PROJECT EXPECTATIONS

HOW WE'LL WORK TOGETHER

PHASE I DELIVERABLES

All Phase I items listed below are due within the **first 30 days** of the project. Timely delivery is essential — late or incomplete materials directly impact your go-live date.

WEEKLY PROJECT CADENCE

The project team will meet with your team for **1.5 hours each week**, broken into:

30 min

CHECK-IN CALL

60 min

WORKING SESSION

✂ Attendance and engagement are required for a successful project. Decision makers should attend these calls so blockers can be resolved in real time.

PHASE I

ITEMS TO PREPARE

DUE DATE All items in this section are due within the first 30 days of the project.

PRODUCT CATALOG

- ▶ Product catalog (in Rev.io format) with all billable / non-billable products & features
- ▶ Catalog must include proper tax mapping based on your selected tax provider
- ▶ Rev.io does not consult on tax laws or perform filings — consult a third-party compliance expert

CDR FORMATS / RATING

- ▶ API credentials and documentation from each of your carriers — *or* a responsive point of contact at the carrier we can work with directly
- ▶ Live feed for each CDR/carrier and completed CDR workbook required
- ▶ Rate decks (including international)

MERCHANT STATEMENTS

- ▶ Three (3) most recent merchant statements for all payment methods (AMEX, Visa, Discover, MC, ACH) for Rev.io Payments Quote
- ▶ API login ID and transaction key required to establish merchant profile
- ▶ Existing saved credit card / ACH payment account info and customer mappings required for token migration

GENERAL INFO & BUSINESS RULES

- ▶ Company logo in .JPG or .PNG (183 × 110 recommended)
- ▶ Documentation of billing rules: cycle dates, late/termination fees, delivery methods, collections process, etc.
- ▶ End-customer support contact info (email & phone) for Rev.io to reference and route inquiries to

DATA MIGRATION

PREFERRED DATA SOURCES

Rev.io has a strong preference for how we receive data from your current system. Listed from most to least preferred — please provide the highest-priority option available, as your choice directly affects migration timeline, accuracy, and effort.

1

API Access MOST PREFERRED

Cleanest, most complete, and most current data. Lets our team pull exactly what's needed on demand and validate against live records — minimizes back-and-forth.

2

Database Backup

Gives our Data Engineers full visibility into your data structure, relationships, and history. Best option when API access is unavailable.

3

Database Reports

Standard reports exported from your current system. Works well when API/backup access is restricted; may require additional reports to capture all fields.

4

DM Template (Client Completed) LAST RESORT

Final option — your team manually populates the Rev.io Data Migration Template. Highest effort and risk of data gaps; used only when no system-level access is available.

ACTIVATION

GOING LIVE

The Activation date is when Rev.io notifies you that implementation (setup, configuration, training, conversion) has been completed per your signed Project Charter and Licensed Products are available for use.

→ Upon Activation, Rev.io Licensing Fees commence and you may begin sending emails and bills out of the system.

PHASE II

TRAINING & OPTIMIZATION

Following activation, Phase II trains your team and optimizes the system over the first two months of use.

TRAINING & MODULES

- Included: Collections, Inventory, Workflow Processes, Request Templates
- Optional (if applicable): SYNC, Integrations, Analytics, Provisioning (Odin)
- Agents/Commissions covered in Phase I

REV.IO PSA

- Rev.io PSA brings helpdesk, project management, billing, and reporting into one AI-native platform
- Phase II introduces PSA capabilities relevant to your workflow: service desk, time tracking, scheduling & dispatch, and the mobile app
- Unified back-office for MSPs, security integrators, and field service businesses

SUPPORT RESOURCES

- Review roles and responsibilities of Rev.io team members
- How and when to contact Client Success
- Access to product documentation and training materials

TRAIN THE TRAINER

- You "drive" configuration of additional settings to build confidence
- Rev.io University, product documentation, and training videos available throughout

ONBOARDING CHECKLIST

A consolidated list of everything you'll need to provide during onboarding. Use this as a quick reference to track your progress.

Check each item as it's delivered to your project team.

- | | |
|--|---|
| ☐ Product catalog in Rev.io format (billable & non-billable items) | ☐ Tax mappings to a supported tax database |
| ☐ Carrier API credentials & documentation — or a responsive carrier point of contact | ☐ Completed CDR workbook for each carrier |
| ☐ Live CDR feed for each carrier | ☐ Rate decks (domestic and international) |
| ☐ 3 most recent merchant statements (AMEX, Visa, Discover, MC, ACH) | ☐ Merchant API login ID & transaction key |
| ☐ Saved payment account info (cards, ACH, customer mappings) | ☐ Company logo in .JPG or .PNG (183 × 110) |
| ☐ Billing rules documentation (cycles, fees, delivery, collections) | ☐ Migration data source (API access, DB backup, reports, or DM template) |
| ☐ User list for system access provisioning | ☐ Sample quote template |
| ☐ Sample invoice | ☐ End-customer support contact info (email & phone) for Rev.io to reference |

END-CUSTOMER SUPPORT CONTACT

Provide the support email address and phone number Rev.io should reference and route end-customer inquiries to during and after onboarding.
